

NATURE BINGO

Try to make bingo once a week by marking off the things you see on your adventures!

| | | | | |
|--|---|--|--|---|
| Saw a bird's nest and left it where it was. | Used one of my five senses to study a tree. | Planted a seed or tended a plant. | Looked for different shapes in the clouds. | Drew a picture of an animal or plant I saw outside. |
| Looked for a flower in every color of the rainbow. | Visited a body of water (ocean, lake, pond, river, stream, puddle). | Collected a natural object (stone, shell, seed, feather, snakeskin). | Identified at least three different insects. | Looked for constellations in the night sky. |
| Looked for animal tracks &/or scat. | Wished on a dandelion. |  | Watched the sunrise or the sunset. | Saw the moon (bonus: tried to identify its phase). |
| Sang to or played music for a plant. | Felt the rain on my skin. | Read a book about nature. | Smelled some flowers. (Did they all smell sweet?) | Counted seconds (Mississippi's) between thunderclaps. |
| Played in the dirt (made a mud pie, looked for worms). | Searched for four-leaf clovers. | Felt the wind blow & tried to figure out which direction it was coming from. | Made a leaf rubbing (with paper & crayons) & tried to identify the type of tree. | Ate something that you, a friend, or a farmer grew in the garden. |
